# CINEMA MANAGEMENT SYSTEM

Step 1:

- Download the Zip file
- Unzip the file and save the folder

Step 2:

- Open the Cinema Management System Folder
- Open the CinemaManagementSystem.sln File on Visual Studio
- Load the database file into the system

- Right click on the database and get the properties where the connection string is.

Use the connection string In the global class.

```csharp
using System;
using System.Collections.Generic;
using System.Linq;
using System.Text;
using System.Threading.Tasks;

namespace CinemaManagementSystem
{
    6 references
    class Global
    {
        private static int role = 0;
        public static string connectionString = @"Provider=Microsoft.ACE.OLEDB.12.0;Data Source=""C:\Users\ad
        0 references
        public static int Role
        {
            get { return role; }
            set { role = value; }
        }
    }
}
```

Login into the application
